

Sometimes a “quick fix” does not make you smile more...

At **Smile Artistry™** we create Smile Masterpieces™ that provide amazing changes in peoples' lives. Feel more relaxed and proud to smile! Project yourself with confidence!

A beautiful smile can enhance both your social and business self-esteem. Studies show an attractive smile is linked to a perception of success, intelligence and friendliness. (BEALL, 2007)

Case One

Problem:

Missing teeth with unsightly resin veneers showing unhealthy gum line management and incorrect tooth dimensions.

Solution:

Gumlift and soft tissue management with well-designed Porcelain Veneers and Crowns.

Case Two

Problem:

Worn teeth with size discrepancy and a lack of correct tooth guidance arrangement.

Solution:

Crownwork which rejuvenated worn teeth as well as a correct bite arrangement.

Case Three

Problem:

Missing tooth, peg-shaped tooth and spacing problems.

Solution:

Gumlift, Porcelain Crowns, Veneer and Bridgework carefully rejuvenate a difficult case.

Case Four

Problem:

Thick “add-on” porcelain veneers, fell off five times in the first year due to poor bite management and the “minimal-drill” technique.

Solution:

New porcelain veneers and crowns creating normal biting edge thickness, widened smile display and a correctly protected bite arrangement.

Sometimes a quick-fix does not make you smile more, because creating an amazing smile is not always so simple. Smile Artistry™ undertakes a detailed process of assessment before a smile can be enhanced.

By dealing with all issues relating to general health and conditions, medication, oral health problems, bite management and finally recommending the best techniques and materials, Smile Artistry™ can provide a long-term result. Prior assessment and treatment of decay and gum disease under the direction of our Hygiene Department will also assist with the long-term health of your mouth and smile.

Our on-site technical laboratory services provide you with all treatment in the one location. All of our procedures are detailed in our website.
